

Dear Value Partner,

Be AWARE OF FAKE MEDITECH PRODUCTS BEING SOLD IN INDIA.

We recently came across some Fake Meditech Products being sold in India. After testing we found that these products were heavily under dosed and have impurities higher than 6%.

Which is very bad for user as because of higher impurities body starts to destroy the anabolic you are injecting, and develops tolerance towards that salt. Also these impurities can result into abscess, internal infection, tissue damage, nerve damage etc.

How to identify the FAKE product.

1) all Meditech products are manufactured in highly automated GMP and WHO units, so you will find all the labels are in its places, nothing is unaligned. See the image.

2) NEVER VERIFY Meditech PRODUCTS USING A LINK, Always open a new browser and type meditechpharmaceutical.net.

3) ALL MEDITECH PRODUCTS HAVE 2 CODES, One visible and another you will find after scratching the security label. TO VERIFY YOU HAVE TO USE BOTH THE CODES.

STAY SAFE BUY ORIGINAL. NOTHING IS MORE IMPORTANT THAN YOUR WELL BEING

Your Sincerely,
Team Meditech
